

# “Where there is no wine there is no love.”

- EURIPIDES

Wine plays witness to our most intimate moments. Over wine we fall in love, celebrate, negotiate, and simply relax. It is the music that underscores our story.

Building a wine cellar in your home is a special way to celebrate that most special of substances. With inspired design, wine cellars not only protect your liquid assets, they add flair, intrigue, and prestige to your home and create a unique space for wine tasting and entertaining.

You expect the best from your wine and should demand nothing less of the designer and contractor building your dream room. Here are the steps to follow.

## Needs Assessment

- the designer should meet with you to assess your needs, budget, and space,
- how will the room be used – simply for storage or also for entertaining?
- what style do you want – a taste of Tuscany or a sleek, modern design?
- what type of racking is required?
- what are the technical considerations – humidity, ceiling height, ventilation requirements?

## Design

- the designer will present multiple design approaches for your consideration and approval.
- carefully review lighting options and finishes for floors, walls and cabinetry – these elements will define the flavour of your room.

## Construction

- a qualified contractor will provide a comprehensive schedule, certified trades and warranty.

## Cheers!

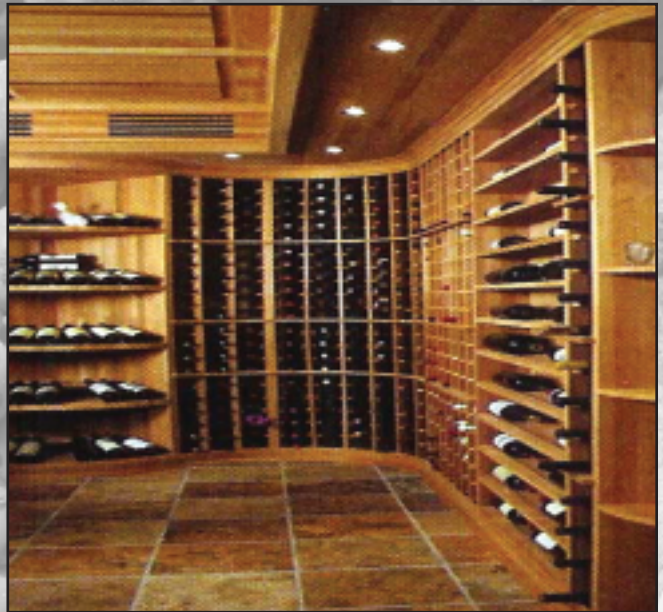

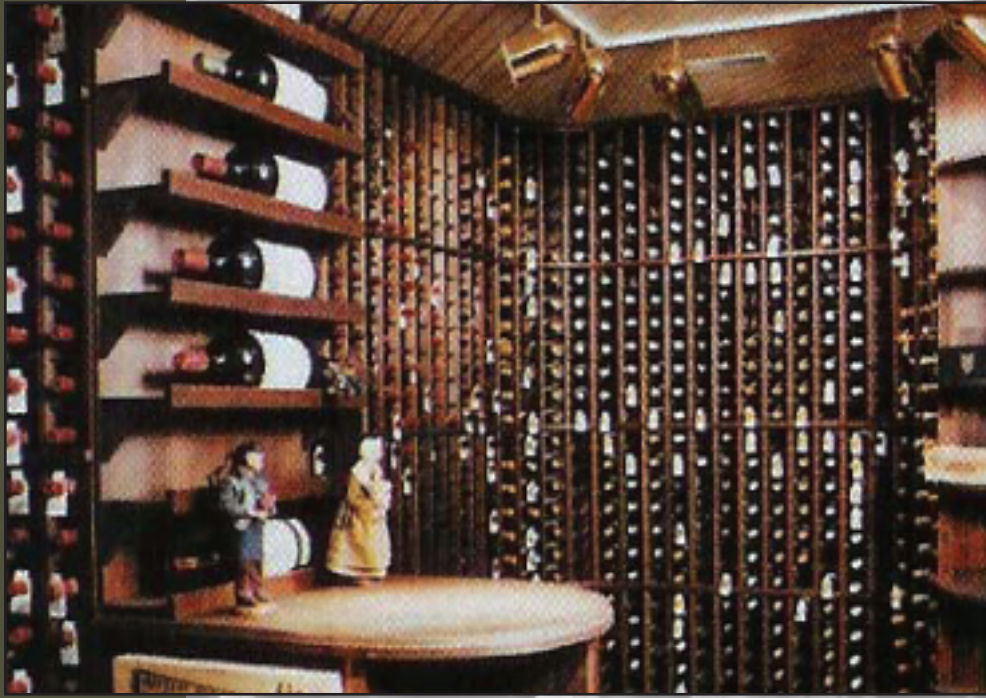

- remove cork
- fill glass
- enjoy!

Creating a wine cellar for your new or existing home should be like a fine wine ... easy on the palette with a lovely, lasting finish.
